

**Project Design Phase-II**  
**Technology Stack (Architecture & Stack)**

|               |                                 |
|---------------|---------------------------------|
| Date          | 03 October 2022                 |
| Team ID       | PNT2022TMID29998                |
| Project Name  | Project -Retail stock inventory |
| Maximum Marks | 4 Marks                         |

**Technical Architecture:**

IBM COGNOS ANALYTICS

**Table-1 : Components & Technologies:**

| <b>S.No</b> | <b>COMPONENT</b>   | <b>DESCRIPTION</b>  | <b>TECHNOLOGY</b>   |
|-------------|--------------------|---|---|
| 1.          | User Interface     | The user interacts with application using Web UI  | HTML, CSS, JavaScript   |
| 2.          | Data Processing    | The data from the dataset is pre-processed  | IBM Cognos Analytics  |
| 3.          | Cloud Database     | The clean dataset is stored on IBM Cloud  | IBM Cloud   |
| 4.          | Data visualization | The data is visualized into different forms   | IBM Cognos Analytics, Python  |
| 5.          | Prediction         | These Algorithm techniques are used to predict the proper way to make the stock in store. | ML algorithms –Logistic Regression, Linear Regression, Random Forest, ABC Techniques. |

**Table-2: Application Characteristics:**

| <b>S. No</b> | <b>CHARACTERISTICS</b>   | <b>DESCRIPTION</b>   | <b>TECHNOLOGY</b>  |
|--------------|--------------------------|--|--|
| 1.           | Open-Source Frameworks   | Open-source frameworks used  | IBM Cognos Analytics, Python   |
| 2.           | Security Implementations | Request authentication using Encryptions                             | Encryptions  |
| 3.           | Scalable Architecture    | Scalability consists of 3-tiers                                      | Web Server – HTML, CSS, Javascript<br>Application Server – Python<br>Database Server – IBM Cloud |
| 4.           | Availability             | The application is available for cloud users                         | IBM Cloud Hosting  |
| 5.           | Performance              | The user can know how to maintain the inventory to increase profits. | ML algorithms  |
